

KidsMed pediatric clinic is now open and ready to accept small patients.

We can bring relief to small aching stomachs and throats, bid farewell to coughs and hoarseness, find out the cause of a sour expression on the face, and administer a vaccine to help keep diseases away.

We invite both ill and healthy babies, as well as kindergarten and school children, to come visit us.

Our full range of medical services includes:

- comprehensive pediatrician's care
- yearly examinations
- compulsory and recommended inoculations
- specialists consultations
- laboratory examinations
- home visits
